Stochastic Processes and their Applications 40 (1992) 363-364
North-Holland

Author Index Volume 40 (1992)*

Arjas, E., P. Haara and I. Norros, Filtering the histories of a partially observed marked point process (2)225-250
Çinlar, E., Sunset over Brownistan (1) 45- 53
Cottrell, M., Mathematical analysis of a neural network with inhibitory coupling (1)103-126
Csörgő, S. and D.M. Mason, Intermediate- and extreme-sum processes (1) 55- 67
Davis, R.A., K. Knight and J. Liu, M-estimation for autoregressions with infinite variance (1)145-180
Dijk, N.M. van, Approximate uniformization for continuous-time Markov chains with an application to performability analysis (2)339-357
Ellis, R.S. and K. Wang, Limit theorems for maximum likelihood estimators in the Curie-Weiss-Potts model (2)251-288
Gaenssler, P. and K. Joos, Another view on martingale central limit theorems (2)181-197
Geluk, J.L., Second order tail behaviour of a subordinated probability distribution (2)325-337
Glynn, P. and K. Sigman, Uniform Cesaro limit theorems for synchronous processes with applications to queues (1) 29- 43
Graham, C., McKean-Vlasov Ito-Skorohod equations, and nonlinear diffusions with discrete jump sets (1) 69- 82
Haara, P., *see* E. Arjas (2)225-250
Joos, K., *see* P. Gaenssler (2)181-197
Kallenberg O., Some time change representations of stable integrals, via predictable transformations of local martingales (2)199-223
Kallenberg, W.C.M., *see* D.P. Kroese (2)309-323
Kersting, G., A law of large numbers for stochastic difference equations (1) 1- 13
Kersting, G., Asymptotic Γ-distribution for stochastic difference equations (1) 15- 28
Knight, K., *see* R.A. Davis (1)145-180
Kroese, D.P. and W.C.M. Kallenberg, Second-order asymptotics in level crossing for differences of renewal processes (2)309-323
Leroux, B.G., Maximum-likelihood estimation for hidden Markov models (1)127-143
Liu, J., *see* R.A. Davis (1)145-180
Mason, D.M., *see* S. Csörgő (1) 55- 67

* The issue number is given in front of page numbers.
